

Service Rolls

Precisionaire service rolls are air filtration media in manageable roll sizes. Several media types and roll widths are available, and in most cases a single cut will produce a ready-to-install filter pad. Filter media offered as service rolls are:

Spun glass

A rigid, nominal 3/8" thickness untreated (no adhesive) spun glass. It is typically used to make rigid pads for use in room unit air conditioners. It is designed for use without a frame. Since it is untreated, it will not harm the plastic frequently used in the construction of room units.

Foam

A rugged polyurethane foam that is designed for use in room unit air conditioners and in pad-holding frames. It is washable and will withstand repeated cleaning with mild soap and water. Offered in 1/4", 1/2", 1" and 2" thicknesses.

Permaire

A rugged, washable medium comprised of latex-coated organic fibers on a scrim backing material. Permaire is self-supporting and requires no frame. Cut a pad of Permaire and you have a filter ready to install. Offered in 1/2", 1" and 2" thicknesses.

Aluminum

1/4" thickness expanded aluminum mesh of the type used in room unit air conditioners. Washable. Recoat with Precisionaire filter spray after cleaning. (Also see Section 5 of the Precisionaire catalog for additional thicknesses.)
