## GAS & VAPOR ADSORBERS

### Activated carbon adsorber for gases and vapors

- Special low pressure drop design for upgrading existing systems.
- Effectively removes VOCs, ozone and other gases for optimum IAQ.
- Contains 60% activity virgin coconut shell carbon for maximum VOC adsorption in parts per billion (ppb) range.
- Available in rechargeable or disposable panels.
- Offered in efficiencies of 25% and 80% (based on ozone, single pass).

### Side access housing

- Economical solution for ASHRAE Standard 62-1989 requirements.
- Accommodates either disposable or rechargeable panels.
- Prefilters and adsorbers use same track, dramatically increasing filter surface area for minimal pressure drop
