

FILTRATION GROUP

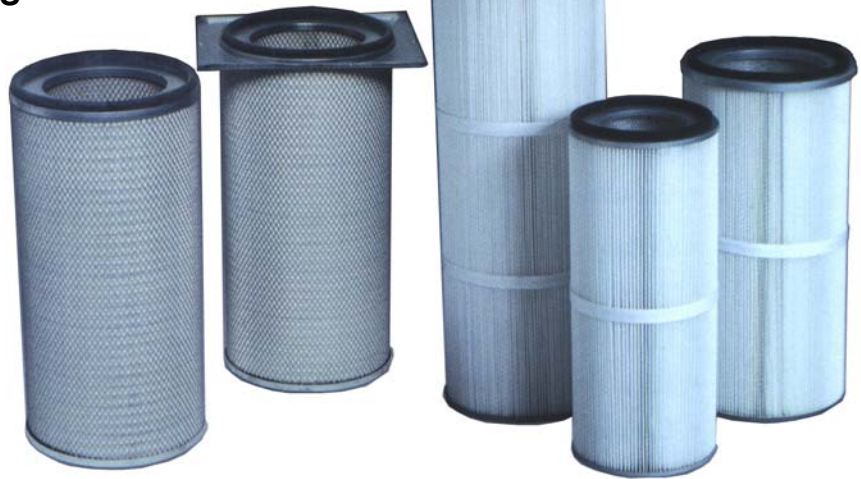

DUST COLLECTOR CARTRIDGES

- Superior quality
- Competitive pricing
- Outstanding service and delivery
- Efficiencies up to 99.97%
- Higher temperatures — up to 275°F
- Pleat rigidity
- Improved filter service life
- Innovative design and technical support
- Reduced maintenance cost
- Ongoing research and development

DESCRIPTION

Filtration Group manufactures cartridges to suit your dust collection needs. Our design utilizes the latest pleating technology to enhance dust removal in demanding or high performance applications. These high quality cartridges are fabricated in a variety of styles and configurations. Filtration Group can manufacture cartridges with end caps to fit a variety of brands and replacement cartridges.

Utilizing a wide assortment of media, we can design a cartridge to meet your exact requirements. From cellulose to spunbond polyester media, Filtration Group can match the right media to your application.

APPLICATIONS

Filtration Group can help you select a cartridge best suited to your application based upon the following information:

- Characteristics of dust
- Chemical content of dust
- Concentration of dust
- Pressure
- Moisture content of dust
- Square feet of filter media
- CFM requirement
- Temperature range
- Type of existing equipment and hardware
- Operating experience

CONSTRUCTION

Standard or corrosion resistant end caps of galvanized or stainless steel can be furnished to suit specific applications. Likewise, a variety of media is available to match job requirements.

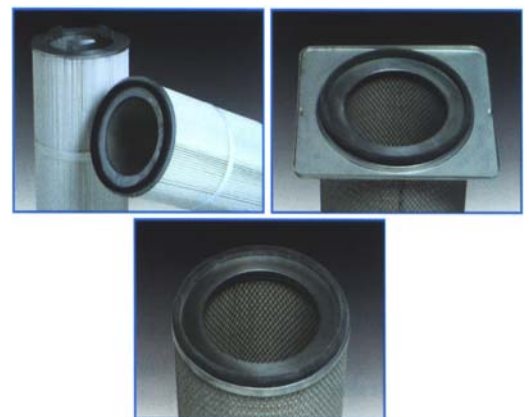

MEDIAS

Some of the proprietary media that Filtration Group uses include:

- Cellulose
- Cellulose/Synthetic Blends
- Fire Retardant
- Spunbond Polyester
 - Standard
 - Hydro-oleophobic
 - Aluminized
 - With PTFE Membrane

OEM REPLACEMENT CARTRIDGES

Cartridges for all types of dust collector manufacturers.
