

PURACELL™ II

Mini-Pleat Series

 **Glasfloss® Industries, INC.**
Excellence in Air Filtration Since 1936

PURACELL™ II

Mini-Pleat Series

Features.

The Glasfloss Puracell II Mini-Pleat Series is designed for use in applications where a high degree of efficiency is required in a 4" filter. The Puracell II Series combines state-of-the-art mini-pleat construction techniques with superior reliability to offer maximum value for commercial and industrial applications. Additionally, the Puracell II offers unique advantages over the traditional 12" rigid box filter including lower freight costs, reduced storage area requirements and less impact on landfills. The Glasfloss Puracell II comes in a variety of sizes and efficiencies.

Construction.

Puracell II filters are manufactured with high efficiency, microfiber media which contains a water repellent binder. These unique fibers are moisture resistant and do not support the growth of bacteria or mold. Each filter incorporates a heavy-duty, double walled, moisture resistant frame that is bonded around the perimeter of the filter pack. The high efficiency media of the Puracell II is separated and supported by uniform glue beads which maximize the filtration area and reduce airflow restriction.

Applications.

The Glasfloss Puracell II Series is designed for use where a high degree of cleanliness is required and contaminants must be removed to protect life, products or building interiors. The Puracell II Series is used in a variety of applications such as: hospitals, office buildings, manufacturing plants, microelectronic component assembly and food processing.
